Dimond Madechawo

Full-Stack Web Application Developer | Cloud Systems

Zimbabwe Email: diamondkudzai70@gmail.com +263783702724
GitHub: https://github.com/dimondkudzai | LinkedIn: https://linkedin.com/in/dimond-madechawo-450994183

PROFESSIONAL SUMMARY

Full-stack software engineer with 5+ years experience designing and deploying scalable web applications, APIs, and cloud-based systems. Experienced in React, Python, Node.js, Databases, CI/CD, and AI-driven applications.

🌐 Portfolio : https://dimondweb.vercel.app

EDUCATION & CERTIFICATIONS

Kubernetes and Cloud Native (LFS250) – Linux Foundation

Programming Fundamentals Nanodegree – Udacity

Artificial Intelligence Fundamentals Nanodegree – Udacity

Data Analysis Fundamentals Nanodegree – Udacity

Android Developer Fundamentals Nanodegree – Udacity

PROFESSIONAL EXPERIENCE

Fullstack Developer | Archconsult

April 2025 – Present

- Develop and deploy scalable web applications and manage robust CI/CD & DevOps workflows to ensure 99.9% system uptime.
- Collaborate with other stakeholders serving as a technical key player.
- Handled migration from server to serverless cloud hosting cutting deployment time from 1hr to 5min.

Visit Archconsult

Fullstack Developer | Admiral Academy/Glen View 7 study Center

Jan 2020 – Present

- Develop school web apps for efficient service delivery
- Engneered admin tools including a payment tracking system improving revenue collection

Fullstack Developer | Clusters Hub

Jan 2026 – Present (Independent project)

- Architected and deployed an AI-powered web platform using Python and Scikit-Learn, designing scalable backend services, database architecture, and real-time user interactions.
- Engineered a scalable microservices backend that supports real-time user interactions and complex interest-matching algorithms.
- Managed the full deployment lifecycle, ensuring high availability and seamless feature integration for a growing user base.

SKILLS

- **Frontend:** React, Vue, JavaScript, Typescript, HTML/CSS
- **Backend:** Node.js, Python, PHP, REST APIs

- **DevOps/Cloud:** Kubernetes, Docker, CI/CD Pipelines, Git, GitHub Actions
- **Other:** SQL databases, Web3.js, AI/ML (Scikit-Learn), Data Analysis

Open-Source Contributions

- StarkGate Frontend (StarkNet bridge) – React component creation and UI improvements
- Ubuntu - micro service PR, docs organization PR
- DefiHackLabs - contributed to documentation
  View all PRs

Financial tools - Web3 Projects

TON Wallet viewer

- Built a lightweight TON Wallet Viewer using vanilla JS and TonConnect SDK to connect wallets and display real-time balances via Toncenter API (deployed on Vercel).
- Features - View TON wallet in real time.
- Stack: HTML + Javascript, TonConnect SDK (via CDN), TonCenter API

View Demo

Banking System

- Engineered a working prototype of a DeFi dApp
- Developed for simple banking transactions. Features - withdraw, deposit, and view balance.
- Stack: Vyper, Javascript, Web3, HTML, and CSS

Open Repo

SELECTED PROJECTS

CI/CD Pipeline

- Engneered a GitHub repo that uses GitHub Actions for automated builds and deployments.
- Features - Actions builds Docker image → Pushes to Docker Hub → Deploys to K8s cluster
- Stack: GitHub Actions, Docker, Kubernetes, YAML

Open Repo

Believer's Books

- Designed and maintaining a Web Application for book, notes, and study materials sharing.
- Features - View books, download, and upload.
- Stack: Python, PHP, Javascript, HTML, and CSS

Live Demo or Open Project Repository

Clusters Hub

- Engineered backend, frontend, and maintaining a lightweight collaboration tool for skilled people and idealists.
- Features - Create Account, Create new or join existing Clusters, AI integration, structured and organized Clusters with the Author as the Cluster manager.
- Stack: Python, SQL, Scikit-Learn, and Javascript
