Full-Stack Web Application Developer | Cloud & DevOps

Zimbabwe diamondkudzai70@gmail.com +263 783 702 724 GitHub LinkedIn Portfolio

PROFESSIONAL SUMMARY

Self-directed full-stack developer with hands-on experience building and deploying web applications, APIs, cloud-hosted services, and automation workflows. Works across JavaScript, Python, databases, CI/CD, and applied machine learning, with projects spanning education tools, collaboration platforms, and Web3. Currently learning Mandarin Chinese and building practical vocabulary alongside technical skills.

EXPERIENCE

Full-Stack Developer | Archconsult April 2025 – Present

- Develop and deploy web applications and support CI/CD and DevOps workflows.
- Contribute technical input and coordinate with stakeholders on application delivery.
- Migrated a deployment workflow from server-based hosting to serverless cloud hosting, reducing deployment time from about one hour to five minutes.

archconsult.vercel.app

Full-Stack Developer | Admiral Academy / Glen View 7 Study Centre January 2020 – Present

- Build and maintain school-related web applications to support service delivery.
- Develop administrative tools, including a payment-tracking system to help monitor fee collection.

Founder & Developer | Clusters Hub January 2026 – Present

- Designed, built, and deployed a collaboration platform for people to create and join interest-based groups.
- Developed frontend and backend features, database integration, user accounts, and AI-assisted functionality.
- Manage the product lifecycle, from implementation and deployment to ongoing improvements.

clustershub.co.zw

TECHNICAL SKILLS

Frontend: React, Vue, JavaScript, TypeScript, HTML, CSS

Backend: Node.js, Python, PHP, REST APIs

Cloud & DevOps: Docker, Kubernetes, CI/CD, Git, GitHub Actions

Data & AI: SQL databases, scikit-learn, data analysis

Web3: Web3.js, TonConnect, smart-contract prototypes

Languages: English; Mandarin Chinese (beginner, learning)

SELECTED PROJECTS

Clusters Hub
Collaboration web app with account creation, group management, and AI-assisted features.

Python · SQL · JavaScript · scikit-learn

Live app · Repository

TON Wallet Viewer
Lightweight wallet viewer that connects a wallet and displays balances through an API.

JavaScript · TonConnect SDK · Toncenter API

Live demo

DeFi Banking System
Prototype supporting basic deposit, withdrawal, and balance-viewing interactions.

Vyper · JavaScript · Web3 · HTML · CSS

Repository

Kubernetes CI/CD Pipeline
Automated workflow to build a Docker image, push it to Docker Hub, and deploy to a Kubernetes cluster.

GitHub Actions · Docker · Kubernetes · YAML

Repository

Believer's Books
Web app for sharing, browsing, uploading, and downloading books and study materials.

Python · PHP · JavaScript · HTML · CSS

Live demo · Repository

OPEN-SOURCE CONTRIBUTIONS

- StarkGate frontend (Starknet bridge): React component and UI improvements.
- Ubuntu: microservice and documentation-related pull requests.
- DeFiHackLabs: documentation contributions.

TRAINING & CERTIFICATIONS

Kubernetes and Cloud Native (LFS250) — The Linux Foundation

Programming Fundamentals Nanodegree — Udacity

Artificial Intelligence Fundamentals Nanodegree — Udacity

Data Analysis Fundamentals Nanodegree — Udacity

Android Developer Fundamentals Nanodegree — Udacity

Mandarin proficiency is listed as beginner because study is in progress. This to be updated as my speaking, listening, and workplace vocabulary improve.
